Recall #: R0263 | High Pressure Fuel Pump

Recall Date: 2024 Sep 11

Recall Description

Issue: On certain vehicles, the high-pressure fuel pump could fail. If this happens, the engine may run rough and the check engine light may turn on. This could also cause a sudden loss of engine power while driving. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Genesis Canada will notify owners by mail and advise you to take your vehicle to a dealership to update the engine control module software. The high-pressure fuel pump will be replaced, if necessary. Precautions: In the interim, if you experience a reduction of drive power, or the malfunction indicator light ("MIL") turns on, you should seek service at your Genesis distributor as soon as possible.
