Recall #: 74E3 | PASSENGER OCCUPANT DETECTION SYSTEM (PODS) Recall Date: 2021 Nov 23

Recall Description

The affected vehicles are equipped with a passenger occupant detection system (also known as Body Sense) in the front passenger seat. On these vehicles, the system is integrated in the seat heating and controls the activation of the front passenger airbag. The seat heating is connected to the Body Sense control unit under the front passenger seat via a wire. If the wire has a contact fault, it may cause the passenger occupant detection system (PODS) to detect a malfunction and switch off the passenger airbag even though the seat may be occupied. As designed, a warning light in the instrument panel comes on together with an acoustic warning sound and an error message is displayed in

the instrument cluster. The airbag indicator light shows "passenger airbag off". In the event of a crash, there would be an increased risk of injury to the occupant seated in the front passenger seat if the passenger airbag is switched off/not working.

Remedy

Depending on the seat type, the seat heating mats including the connecting cable or the entire seat cover including the connecting cable will be replaced.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact AUDI or visit [Audi's website](#).
