Recall #: N202313440 | Transmission Accumulator Bolts Missing Recall Date: 2020 Oct 29

Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in the affected vehicles identified above. These vehicles are equipped with a start-stop accumulator that may have missing bolts. Missing bolts on the start-stop accumulator endcap could result in a transmission oil leak and may progress to a loss of propulsion, which could increase the risk of a crash. A transmission oil leak in the presence of an ignition source may increase the risk of fire.

Remedy

Dealers will inspect the start-stop transmission accumulator and replace it if any bolts are missing.
