Recall #: N150299 | DRIVER SIDE REAR PILLAR INTERIOR FIRES Recall Date: 2015 Sep 03

Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2013-2016 model year ATS sedan vehicles. These vehicles have a coil antenna module that powers the rear defogger system located in the driver side rear pillar. In certain of these vehicles, the coil antenna module may generate significant temperatures if the module is subjected to excessive cycling or continuous operation and the module was manufactured with critically weak terminal connectivity.

Remedy

Dealers will reflash the Electronic Climate Control (ECC) module to remove the automatic rear defogger “on” function that occurs as a result of manual or remote start of the vehicle. 2013 models also have a “continuous on” feature (enabled at highway speeds in low temperatures) that will also be disabled. The base functionality of the rear defogger will not be lost. The customer will retain the ability to turn on the function manually from inside the vehicle. This service will be free of charge.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact CADILLAC or visit [GM's website](https://my.gm.ca/gm/en/recalls). (<https://my.gm.ca/gm/en/recalls>)
