## Open Recalls

2GNFLGEK4E6168153

**Recall #:** 2025300 | Front Wiper Transmission Corrosion  
Failure (Canada Vehicles Only)

**Recall Date:** 2018  
Mar 15

### Recall Description

"Certain 2010-2017 model year Chevrolet Equinox and GMC Terrain vehicles located in the provinces of British Columbia, Ontario, Quebec, New Brunswick, Prince Edward Island, Nova Scotia and Newfoundland/Labrador may experience high wiper module transmission ball joint corrosion and/or wear which could result in the separation of one or more ball joints from its corresponding socket during operation. If a ball joint were to separate, one or both of the windshield wipers could become inoperative, which could limit the driver's visibility under certain operating conditions which may increase the risk of a crash causing injury and/or damage to property. The predominant failure mode is water draining through the Air Inlet Panel (AIP) onto the wiper transmission ball joints, leading to grease washout of the link ball sockets. As the grease washes out of the transmission ball joint sockets, contaminants are able to enter the joints causing corrosion and wear of the link ball and socket, resulting in a reduced retention force of the joint. "

### Remedy

Dealers will replace the front wiper module with a new module with improved ball joints and a water deflector. In addition, dealers will fill the water management hole near the passenger side wiper pivot and drill a small hole on the adjacent wall of AIP to direct water away from the wiper transmission joints.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact CHEVROLET or visit [GM's website](https://my.gm.ca/gm/en/recalls). (https://my.gm.ca/gm/en/recalls)

## ICBC Disclaimer

The information supplied by ICBC is a report of the vehicle's status and the vehicle's claims history. Vehicle status shows whether a vehicle is qualified to be licensed and is used to track:

- vehicles sold by insurance companies as salvage
- salvage vehicles which have been rebuilt, inspected, and relicensed
- wrecked vehicles that have been decommissioned and can only be resold for parts

The vehicle status may not represent the vehicle accurately for a number of reasons, including a written-off vehicle that hasn't been reported to the B.C. vehicle registry or a vehicle with major damage that was repaired by its owner. The vehicle claims history is a report of vehicle damage and includes repairs paid by ICBC and outstanding damage estimates. It may be incomplete for various reasons, including the owner did not make a claim to ICBC or ICBC has denied the claim. In addition, the estimate information may not necessarily reflect the actual cost of repairs, list the area of the vehicle that sustained the greatest force of impact, or indicate the primary area of damage.

Consumers are encouraged to read ICBC's full statement of limitations at <http://apps.icbc.com/registration/vchr/Limitation.html>.

ICBC recommends the vehicle be inspected by a qualified mechanic to obtain a more complete assessment of the vehicle's condition.

This vehicle history report is compiled from multiple data sources. It is not always possible for CARFAX Canada ULC or its source data providers to obtain complete information on any one vehicle.
