Recall #: 93U9 | HIGH-VOLTAGE BATTERY MODULE(S) Recall Date: 2023 Dec 22

Recall Description

A potentially critical self-discharge condition exists in certain high-voltage battery modules that, in some instances, may lead to thermal overload, possibly resulting in smoke or a fire. A high-voltage battery overheating increases the risk of a fire.

WA1VAAGE3KB009223

Remedy

Update vehicle software and, if necessary, inspect the high-voltage battery modules in affected vehicles. As a precaution, Audi recommends setting the maximum battery charge to 80%. This is an important measure to help protect the high-voltage battery modules in affected vehicles until the recall remedy is available. During the first battery module inspection, dealers will affix labels to the vehicle as a reminder to set the maximum battery charge to 80%.The vehicle owners manual contains important information about charging the vehicle, and regarding the vehicles warning lights and messages. We encourage owners and anyone who drives the vehicle to review the owners manual to become familiar with charging procedures, and with the types of vehicle indicators, warnings and messaging they may see.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact AUDI or visit [Audi's website](https://web.audiusa.com/recall). (https://web.audiusa.com/recall)
