Open Recalls

Recall #: WQK-47 | BRAKE LINE CORROSION Recall Date: 2014 Jul 15

Recall Description

On certain vehicles the center and rear brake lines may become perforated due to corrosion. This would cause a leak in the brake system potentially increasing stopping distances which could increase the risk of a crash causing injury and/or damage to property.

Remedy

Subaru will inspect and test the current condition of your vehicle's brake lines. If they are found to be acceptable anti-corrosion material will be applied to the areas of concern as a preventative measure. If any of the lines are found to be unacceptable they will be replaced and anti-corrosion material will be applied to the new brake lines. These repairs will be performed at no cost to you.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact SUBARU or visit [Subaru's website](https://www.subaru.ca/WebPage.aspx?WebSiteID=282&WebPageID=21091). Recall #: TKC-19 | Front Passenger Airbag Inflator Recall Date: 2019 Jan 09

Recall Description

On certain vehicles long-term exposure to high absolute humidity and temperature combined with high temperature cycling may eventually degrade the propellant contained in the passenger-front airbag. This could cause the airbag to deploy with more force than normal. If the airbag inflator ruptures fragments could be propelled toward vehicle occupants or cause damage to the airbag assembly preventing its proper function.

Remedy

Owners will be notified by mail and instructed to take their vehicle to a dealer to have the passenger-front airbag inflator replaced. Note: The Canadian climate results in the propellant degrading slowly. This recall is being conducted as a precaution to address future risk. It is expected that all airbag inflators will be replaced before their function would be affected.
