Recall #: N130036 | BRAKE LAMP MALFUNCTION Recall Date: 2014 Aug 19

Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in 2004-2012 model year (MY) Chevrolet Malibu, 2004-2007 MY Chevrolet Malibu Maxx, 2005-2010 MY Pontiac G6, 2007-2010 MY Saturn Aura vehicles. On these vehicles, over time an increased resistance can develop in the Body Control Module (BCM) connection system and result in voltage fluctuations or intermittency in the Brake Apply Sensor (BAS) circuit that can cause service brake lamp malfunction. As a result, the service brake lamps may illuminate when the service brakes are not being applied, or may not illuminate when the service brakes are being applied. Additionally, cruise control may not engage. If cruise control is engaged, additional service brake pedal travel may be required to disengage it. Service brake pedal application may not be required to move the shift lever out of PARK, or additional service brake pedal travel may be required to move the shift lever out of PARK. Traction control, electronic stability control, and panic braking assist features, if equipped, may be disabled. Service ESC and/or Traction Control tell-tales may illuminate with this condition.

Remedy

Dealers are to attach the wiring harness to the BCM with a spacer, apply dielectric lubricant to both the BCM and harness connector and on the BAS and harness connector, and relearn the brake pedal home position.

These vehicles have a condition in which the transmission shift cable may fracture at any time.

Remedy

ICBC Disclaimer

The information supplied by ICBC is a report of the vehicle's status and the vehicle's claims history. Vehicle status shows whether a vehicle is qualified to be licensed and is used to track:

- vehicles sold by insurance companies as salvage
- salvage vehicles which have been rebuilt, inspected, and relicensed
- wrecked vehicles that have been decommissioned and can only be resold for parts

The vehicle status may not represent the vehicle accurately for a number of reasons, including a written-off vehicle that hasn't been reported to the B.C. vehicle registry or a vehicle with major damage that was repaired by its owner. The vehicle claims history is a report of vehicle damage and includes repairs paid by ICBC and outstanding damage estimates. It may be incomplete for various reasons, including the owner did not make a claim to ICBC or ICBC has denied the claim. In addition, the estimate information may not necessarily reflect the actual cost of repairs, list the area of the vehicle that sustained the greatest force of impact, or indicate the primary area of damage.

Consumers are encouraged to read ICBC's full statement of limitations at <http://apps.icbc.com/registration/vchr/Limitation.html>.

ICBC recommends the vehicle be inspected by a qualified mechanic to obtain a more complete assessment of the vehicle's condition.
