Recall #: CAN213 | 213 - Remedy Notice - Certain 2005-2011 model year Tacoma (Access Cab) - Front Seat Belt

Recall Date: 2013 Aug 07

Recall Description

The seat belt assemblies for the driver and front passenger are mounted inside the access doors (rear doors) of the subject vehicles. The screws that attach the seat belt pre-tensioner to the seat belt retractor within the seat belt assembly can become loose over time due to repeatedly and forcefully closing the access door. If the screws loosen completely, the seat belt pre-tensioner and the retractor spring cover could detach from the seat belt retractor. If this condition occurs, the seat occupant may not be properly restrained, increasing the risk of injury in the event of a crash, sudden stop or rollover event.

Remedy

Any Toyota dealership will inspect the seat belt assembly. Based on the inspection, the seat belt assembly may be replaced or new pre-tensioner screws will be installed with thread-locking sealant to prevent loosening of the screws.
