Recall #: 9916H | LIFTGATE STAY DAMPER CONCERN Recall Date: 2016 Sep 09

Recall Description

Insufficient corrosion protective coating was applied to the ends of the external cylinders of the rear hatch/lift gate gas stay dampers (lift

supports). If water containing road salt enters, it can cause corrosion. Over time, increased corrosion may eventually cause it to break as the rear hatch or lift gate is opened.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact MAZDA or visit Mazda's website. (https://www.mazda.ca/en/owners/recalls/)

ICBC Disclaimer

The information supplied by ICBC is a report of the vehicle's status and the vehicle's claims history. Vehicle status shows whether a vehicle is qualified to be licensed and is used to track:

- vehicles sold by insurance companies as salvage
- salvage vehicles which have been rebuilt, inspected, and relicensed
- wrecked vehicles that have been decommissioned and can only be resold for parts

The vehicle status may not represent the vehicle accurately for a number of reasons, including a written-off vehicle that hasn't been reported to the B.C. vehicle registry or a vehicle with major damage that was repaired by its owner. The vehicle claims history is a report of vehicle damage and includes repairs paid by ICBC and outstanding damage estimates. It may be incomplete for various reasons, including the owner did not make a claim to ICBC or ICBC has denied the claim. In addition, the estimate information may not necessarily reflect the actual cost of repairs, list the area of the vehicle that sustained the greatest force of impact, or indicate the primary area of damage.

Consumers are encouraged to read ICBC's full statement of limitations at http://apps.icbc.com/registration/vchr/Limitation.html.

ICBC recommends the vehicle be inspected by a qualified mechanic to obtain a more complete assessment of the vehicle's condition.
