Recall #: CAN184 | 184 - Remedy Notice - Certain 2001-2004 model year Tacoma vehicles - More Than Normal Rust to the Spare Tire Carrier Lift Plate

Recall Date: 2012 Nov 21

Recall Description

The spare tire in the subject vehicles is located underneath the rear of the vehicle and is held in place by a spare tire carrier. A lift plate on the carrier is used to raise and lower the tire. During the manufacture of the lift plate, the plate may not have received adequate corrosion-resistant protection. This combined with exposure to road salts and other environmental factors, and where the vehicle is operated in cold climate regions, may contribute to the development of excessive corrosion of the lift plate. Over time, the development of excessive corrosion of the lift plate could cause the spare tire to separate from the vehicle and create a road hazard for other vehicles, or cause a collision

Remedy

Any Toyota dealer will perform an inspection of the Spare Tire Carrier assembly to assess the condition of the Lift Plate and the potential for spare tire separation during vehicle usage. Based upon the results of the inspection, if excessive corrosion of the Lift Plate is found, the dealership will replace the Spare Tire Carrier

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact TOYOTA or visit **Toyota's website**. (https://www.toyota.ca/toyota/en/owners/recalls)

ICBC Disclaimer

The information supplied by ICBC is a report of the vehicle's status and the vehicle's claims history. Vehicle status shows whether a vehicle is qualified to be licensed and is used to track:

- vehicles sold by insurance companies as salvage
- salvage vehicles which have been rebuilt, inspected, and relicensed
- wrecked vehicles that have been decommissioned and can only be resold for parts

The vehicle status may not represent the vehicle accurately for a number of reasons, including a written-off vehicle that hasn't been reported to the B.C. vehicle registry or a vehicle with major damage that was repaired by its owner. The vehicle claims history is a report of vehicle damage and includes repairs paid by ICBC and outstanding damage estimates. It may be incomplete for various reasons, including the owner did not make a claim to ICBC or ICBC has denied the claim. In addition, the estimate information may not necessarily reflect the actual cost of repairs, list the area of the vehicle that sustained the greatest force of impact, or indicate the primary area of damage.

Consumers are encouraged to read ICBC's full statement of limitations at http://apps.icbc.com/registration/vchr/Limitation.html.

ICBC recommends the vehicle be inspected by a qualified mechanic to obtain a more complete assessment of the vehicle's condition.
