Recall #: CAN220 | 220 - Remedy Notice - Certain 2004-2005 and 2007-2009 model year Sienna vehicles - Shift Lock Solenoid Assembly

Recall Date: 2013 Sep 26

Recall Description

The subject vehicles are equipped with a shift lever assembly which contains a shift interlock system. One of the components of the interlock system is a shift lock solenoid to prevent the shift lever from moving out of P position unless the ignition is ON and the brake pedal is depressed. Due to manufacturing issues, there is a possibility that the solenoid could be damaged and the shift lever could be moved out of P position without depressing the brake pedal. This could result in a vehicle roll away, which could cause a crash.

Remedy

Any Toyota dealer will replace the shift lock solenoid assembly in the subject vehicle.

Recall #: CAN243 | 243 - Remedy Notice - Certain 2004-2011 Model Year Sienna vehicles. Sienna Spare Tire Cable Assembly

Recall Date: 2014 May 22

Recall Description

The 2004 through 2011 model year Sienna 2WD vehicles equipped with a spare tire carrier stowed under the vehicle have a light-weight, foam water splash protector installed in front of the spare tire carrier. Due to variation in the placement of the splash protector or loss of the protector during normal usage, water splashed rearward with high concentrations of road salt can reach the spare tire carrier and corrode the spare tire carrier assembly cable. If the vehicle is operated in cold climate regions where road salt is frequently used, in an extreme case, the cable may break due to excessive corrosion and the spare tire may separate from the vehicle, increasing the risk of a crash.

Remedy

Toyota will inspect and, if necessary, replace the entire Spare Tire Carrier assembly with an improved carrier

ICBC Disclaimer

The information supplied by ICBC is a report of the vehicle's status and the vehicle's claims history. Vehicle status shows whether a vehicle is qualified to be licensed and is used to track:

- vehicles sold by insurance companies as salvage
- salvage vehicles which have been rebuilt, inspected, and relicensed
- wrecked vehicles that have been decommissioned and can only be resold for parts

The vehicle status may not represent the vehicle accurately for a number of reasons, including a written-off vehicle that hasn't been reported to the B.C. vehicle registry or a vehicle with major damage that was repaired by its owner. The vehicle claims history is a report of vehicle damage and includes repairs paid by ICBC and outstanding damage estimates. It may be incomplete for various reasons, including the owner did not make a claim to ICBC or ICBC has denied the claim. In addition, the estimate information may not necessarily reflect the actual cost of repairs, list the area of the vehicle that sustained the greatest force of impact, or indicate the primary area of damage.

Consumers are encouraged to read ICBC's full statement of limitations at <http://apps.icbc.com/registration/vchr/Limitation.html>.

ICBC recommends the vehicle be inspected by a qualified mechanic to obtain a more complete assessment of the vehicle's condition.
