Recall #: R21A6 | ALTIMA HOOD LATCH NTB21-055 Recall Date: 2021 Jun 15

Recall Description

If a vehicle is driven with the primary hood latch disengaged, (and the hood partially opened), the secondary hood latch may become contaminated with dirt or corrosion. If the secondary hood latch is not properly inspected and maintained, such dirt or corrosion could then prevent the secondary hood latch from engaging properly.

Remedy

A remedy is now available. Dealers will inspect the latch for proper operation, and clean and lube as needed, or replace the secondary latch if it is not fully functional, at no cost to the owner. In addition, dealers will now install a new hood release lever spring and affix an under-hood latch-maintenance warning label to any vehicles affected by this voluntary safety recall campaign. An Owner s Manual addendum card with instructions on how to lubricate and maintain the secondary hood latch will also be mailed together with the customer notification. The repair should take less than one (1) hour to complete. The dealer may require the vehicle for a longer period of time based upon the dealer s work schedule.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact NISSAN or visit Nissan's website.
