Recall #: R0130 | SONATA / SANTA FE ENGINE INSPECT / REPLACE Recall Date: 2017 Jun 23

Recall Description

On certain vehicles equipped with 2.0L and 2.4L engines, the engine may contain residual metallic debris from factory machining operations. If debris is present, it could potentially restrict oil flow to the main bearings and rod bearings and could lead to premature wear. If the vehicle continues to be driven with worn bearings, the bearings could fail, which could cause an engine stall while the vehicle is in motion, resulting in loss of motive power which could increase the risk of a crash causing injury and/or property damage.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact HYUNDAI or visit [Hyundai's website](#).
