Recall #: P7331 | **INF MODELS 2G3G ITB17-041** Recall Date: 2017 Jul 26

Recall Description
Nissan and Infiniti vehicles equipped with Continental GEN1 TCU devices transmitting at 2/2.5G (GSM/GPRS/UMTS) frequencies and are designed to work with 2G cellular service. The 2G cellular service is no longer active in the United States. The subject 2G TCUs are no longer connected to telematics services and no longer perform any function in the affected vehicles. This campaign is being performed out of an abundance of caution to help safeguard against potential cybersecurity issues. All eligible vehicles that enter the service department for any reason should have the subject 2G TCU deactivated. This campaign will be performed at no charge to the client for parts and labor. Vehicles that have been upgraded to 3G TCUs are not subject to this campaign.

Remedy
Nissan is conducting a Voluntary Service Campaign to disable the 2G TCU. Customers may have this service performed free of charge or they may elect to upgrade to a 3G TCU, which may require a copay in exchange for a connected services premium subscription. This disablement service, which is conducted at no charge to you for parts and labor, should take less than one (1) hour to complete. However, your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact INFINITI or visit [Infiniti's website](#).
