Recall #: 91US | INFOTAINMENT SYSTEM SOFTWARE    Recall Date: 2024 Jun 28

### Recall Description

On the affected vehicles, the rearview camera image may be delayed or deactivated after shifting into reverse. As a result, the rearview camera image may not meet the response time required by Federal Motor Vehicle Safety Standard No. 111, Rear Visibility. A rearview camera with a delayed or deactivated image can reduce the information available to the driver of what is behind the vehicle, increasing the risk of a crash or injury to people outside the vehicle.

### Remedy

Update the infotainment system software.

### ICBC Disclaimer

The information supplied by ICBC is a report of the vehicle's status and the vehicle's claims history. Vehicle status shows whether a vehicle is qualified to be licensed and is used to track:

- vehicles sold by insurance companies as salvage
- salvage vehicles which have been rebuilt, inspected, and relicensed
- wrecked vehicles that have been decommissioned and can only be resold for parts

The vehicle status may not represent the vehicle accurately for a number of reasons, including a written-off vehicle that hasn't been reported to the B.C. vehicle registry or a vehicle with major damage that was repaired by its owner. The vehicle claims history is a report of vehicle damage and includes repairs paid by ICBC and outstanding damage estimates. It may be incomplete for various reasons, including the owner did not make a claim to ICBC or ICBC has denied the claim. In addition, the estimate information may not necessarily reflect the actual cost of repairs, list the area of the vehicle that sustained the greatest force of impact, or indicate the primary area of damage.

Consumers are encouraged to read ICBC's full statement of limitations at <http://apps.icbc.com/registration/vchr/Limitation.html>.

ICBC recommends the vehicle be inspected by a qualified mechanic to obtain a more complete assessment of the vehicle's condition.
