Recall Description

The passenger occupant detection system (PODS) may detect a malfunction and switch off the passenger airbag even though the seat may be occupied. However, the airbag system and the warning strategy operate as designed. If the PODS malfunctions, a warning light in the instrument panel comes on together with an acoustic warning sound and an error message is displayed in the instrument cluster. The airbag indicator light shows "passenger airbag off". This error often occurs sporadic and for a limited amount of time. When the error and consequently the warnings disappear, the passenger airbag works again as intended without any action/interaction necessary by the customer. In the event of an accident necessitating passenger airbag activation there would be an increased risk of injury to the occupant seated in the front passenger seat if the passenger airbag is switched off/not working. Audi has advised that customers can continue driving these vehicles. Please ensure that everyone who uses your vehicle has read the owners manual and is familiar with how the PODS works for the front passenger seat. As designed, in case of a malfunction within the PODS, a warning light in the instrument panel will come on together with a warning sound and an error message will be displayed in the instrument cluster (the airbag indicator light shows "passenger airbag off"). If these warnings appear, Audi recommends that you stop using the front passenger seat and make arrangements to have the vehicle inspected/repaired at an Audi dealership as soon as possible.

Remedy

Replace passenger occupant detection system (PODS) sensor mat and update the PODS control module.
