Recall #: WVX-34 | Lower Control Arm Corrosion 2002 - 2007 Impreza 2003 - 2008 Forester Recall Date: 2011 Nov 30

JF15G63607H734940

Recall Description

On certain vehicles the front lower control arms could corrode due to exposure to humid environments and road de-icing chemicals. Over time corrosion could progress causing thinning and perforation of the steel which could allow the control arm to fracture near the forward pivot attachment to the chassis. Lower control arm failure could result in a loss of vehicle control and a crash causing property damage and/or personal injury.

Remedy

Subaru will inspect and test the current condition of your vehicle's front lower control arms. If both are found to be acceptable anti-rust materials will be applied to the areas of concern as a preventative measure. If either control arm is found to be unacceptable both will be replaced. These repairs will be performed at no cost to you.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact SUBARU or visit Subaru's website. (<https://www.subaru.ca/WebPage.aspx?WebSiteID=282&WebPageID=21091>)
